Clocked Sub-processor List

Service providers that process personal data for Clocked

These are the service providers that process personal data for Clocked, including account data and the content you send to the API. Clocked data is hosted in the United States. Authorised engineers at our affiliate in India may access it remotely for support. This access is logged.

Sub-processor	Purpose	Location
Modal Labs, Inc. New York, NY, USA	Hosting and running the Clocked model (GPU compute)	United States
Microsoft Corporation One Microsoft Way, Redmond, WA 98052, USA	Azure servers that receive API requests; Microsoft 365 for account and support email	United States
Supabase, Inc. San Francisco, CA, USA	Database and sign-in: accounts, key hashes, usage records and responses (deleted within 48 hours)	United States
Vercel Inc. San Francisco, CA, USA	API gateway and website hosting; website analytics without personal identifiers	United States
Actionable Science Labs Private Limited (affiliate) F-14, Nehru Colony, D-1 Block, Dehradun 248001, Uttarakhand, India	Support and engineering, by remote access to resolve a support case or a fault	India (remote access only)

Changes

We will update this list and notify affected business customers directly in writing at least 30 days before adding or replacing a sub-processor. If you object, please email privacy@rezolve.ai before the proposed engagement. Section 7.2(d) of the Clocked Terms of Service sets out what happens if you object.

Stripe (payments) and Wise (challenge payouts) handle payment details under their own terms and are not sub-processors. Google Analytics is used on the website as described in the Clocked Privacy Notice.
